

Professional Services: **Advise Package**

This package is designed to help you achieve a faster time to value and get you off to a strong start during the first 12 weeks with Procore. In this package, the Procore team is available to advise your Procore Committee during the implementation period as you rollout and train your teams. All services included in this package expire 12 weeks after service start date.

Services Included:

Guided implementation.

You will have a named Procore Project Manager (PM) available to guide you through the implementation process. Through weekly calls, they will coordinate consultations and advise you on configuring up to 2 Procore products. This partnership will ensure your team gets fast time to value and achieves your short term goals within the scope of your implementation package, which includes 15 hours of IM services.

Expert product consultation.

In order to help you get the most of your specific Procore toolset, you will have a named Solutions Product Consultant (SPC). Your SPC will work alongside your IM to provide product best practices that have helped thousands of construction companies like yours implement Procore quickly and effectively. This package includes 9 hours of SPC services.

Process improvement and documentation.

Throughout implementation, your PM and SPC will help you translate your existing business processes into Procore. Together you will uncover ways that Procore can help you work more effectively by connecting everyone under one single source of truth. As a final leave behind, you will build out a Standard Operating Procedures document, which will document these processes for future reference.

Add-On Services

Services in addition to those included in this service package—such as an extension of IM services beyond twelve (12) weeks, additional Consulting Services, Remote Admin Services, and Custom Solutions hours, or Training and Integration Services—are available upon request to ensure you have the support needed to be successful. These services are available for a fee and are not included in this scope.

Pricing and Payment Terms

These bundled services are offered at a discount from market rates. Work performed against this services bundle will be conducted via a fixed fee and is due as defined in the order form.
